

EDUCATION

Degree	Specialization	Institute	Year	CPI
B.Tech	<i>Electronic and communication & Engineering</i>	Geethanjali college of engineering and technology	2022-Present	6.2
MPC	<i>Mathematics, Physics, & Chemistry.</i>	TSWRIS (Parigi)	2020-2022	74.0
SSC	-	TSWRIS (ibp)	2014-2020	90.0

PROFESSIONAL SUMMARY

Motivated and enthusiastic electronic communication engineering student with a solid foundation in programming and hardware technology. Proficient in languages such as **C**, **Java** and **Python** and showcasing Problem solving and Technical Skills.

PROJECTS

- **Portfolio:**

<https://portfoliomanik.onrender.com/>

- **Implementing the Embedded system in FPGA.**

- Transferring the data through FPGA using Ethernet, UART, and Peripherals.
- parallel processing data, timer, and UART.

Tools used: EDK, SDK, Xilinx.

Mini project: Analyzing the Effect of Modulation Scheme on 5G Throughput Using 5G Testbed.

- analyzing the different modulations schemes (Qpsk, 16-Qam, 64-Qam).

Tools used: Hardware Requirements:

- Software Defined Radio (SDR) Devices
- 5G Base Station (gNB)
- User Equipment (UE)
- Network Switch/Router (if needed)
- Power Supply and Cooling System

- **Web development using codeless tools**

- Developing a website using codeless tools (**FOOD STORAGE** website)
- Built a **website 'food storage'** that can Help to the people in OLD AGE HOMES and ORPHANAGE to Donate the food.

- **Web development**

Feb-Apr 2022

- We developed a web development for **EMOTIONAL CHALLENGE** as a real-time project.
- This website can Solve the problems in Emotional challenges when entering to this web they have section and chat facilities are available.

- **Automatic Brake system (ABS) using Arduino**

Sept-Dec 2020

- **Programmed an Arduino IDE** to analysis speed of a vehicle and analyze sourcing if anything entering that surrounding area can provide information to the users.
- Developed the **Adder, Multiplier, Neuron, Neural Layer, and Activation Function sub-models from scratch** by taking **input as floating point numbers** and eventually integrated them to run the model.

INTERNSHIPS/WORKSHOPS

- Implementing the **Embedded system** in **FPGA** -BEL (Bharat Electronics Limited)
- **EMBEDDED SYSTEM DEVELOPER VIRTUAL INTERNSHIP – Edu skills**
- **AI –WORKSHOP** - Microsoft AI innovators hub
- Workshop on **AGENT X 2025** in Microsoft AI innovators hub
- Workshop on **WEB DEVELOPMENT USING CODELESS TOOLS. –Brain o vision**

EXTRA-CURRICULAR ACHIEVEMENTS/ACTIVITIES

- Secured **first position in Hand Ball (state level)** games out of **40+ teams** as a part of Handball 2019
- Secured **first position in Volleyball game** out of **20+ competing players** from the institute
- Completion **NCC ‘A’** certification

TECHNICAL SKILLS

- **Languages:** Python, C, Java, MATLAB, Arduino IDE.
- **Tools:** VS Code, GitHub, code leaf, MATLAB, Arduino IDE
